

MCAS Announces a “LUV A LAB” Program

The gentle, intelligent and family-friendly **Labrador Retriever** continues to be the most popular breed in the United States, according to AKC® registration statistics. This versatile hunting breed comes in three colors – yellow, black and chocolate – and because of his aptitude to please his master they excel as guide dogs for the blind, as part of search-and-rescue teams or in narcotics detection with law enforcement.

This breed is the most popular breed at Montgomery County Animal Shelter in Conroe, TX. Currently, we have over 50 Labrador Retrievers that need a fur-ever home or a foster family.

Labs are the ideal sporting and family dog. The Labrador Retriever thrives as part of an active family or as a trusted hunting companion. Because of his even temperament and trainability millions of Americans own a Labrador Retriever as a pet. Our shelter Labs once belonged to a family..and now they need a new family to love, play and care for them.

Will you help?

“**Luv A Lab**” is a program MCAS is offering to folks that want to have a Labrador Retriever as a pet or who want to foster an animal while they find a permanent home.

Our promotion includes all shots, including; Rabies Vaccinations, Parvovirus/Distemper vaccination, Bordatella vaccination, de-worming medication, a Heartworm test and Heartworm treatment if positive. Our promotion also includes Spay/Neuter fees and a Microchip with a lifetime registration. If the dog is not altered, we will require the completion of a “Foster to Adopt” application, at which time we will schedule a Spay/Neuter surgery. **Adoption Fees waived, \$75 donation fee to The Woodlands Dog Park Club required.**

Donations will support Heartworm treatments for all H/W positive shelter animals. Please call us TODAY!
