

Our Mission

The Montgomery County Animal Shelter is committed to the delivery of effective, courteous and responsive animal care and control services to the residents of Montgomery County, Texas.

The Shelter is responsible for Montgomery County's stray, injured, abandoned, neglected and mistreated animals, as well as the enforcement of all state and local Animal Control and Welfare laws.

Our mission is to return pets to their rightful owners, place unwanted or stray animals with new families, coordinate activities with rescue organizations to place animals and save as many lives as possible.

We need you to help save unwanted cats, kittens, dogs and puppies by spaying and neutering your own pet

Our Goals

MCAS works to save as many animals as we can. We intake over 1,600 animals each month - and support from the community is needed to save even more lives and rehome animals. We ask the following of our community:

Volunteer participation – we could not save the lives of companion animals without you

Donations – to help fund our non-profit partners to support additional medical supplies and spay/neuter clinics

Foster families – more fosters means more innocent lives can be saved

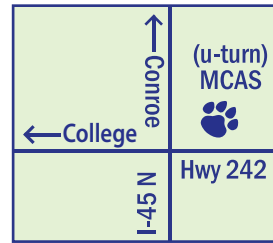

Learn – about promoting the importance of spay and neuter, micro-chipping, animal registrations, pet retention and banning the roadside sale of animals

Montgomery County Animal Shelter

8535 State Hwy 242 • Conroe, Texas 77385

936-442-7738 • Fax: 936-442-7739

www.mcaspets.org • www.facebook.com/mcastx

From I-45N or I-45S, take Exit 79-Highway 242 East. Go over ramp, make the 2nd U-turn. MCAS is on the right.

MONTGOMERY COUNTY ANIMAL SHELTER

Please "Opt to Adopt" your next pet from MCAS

www.mcaspets.org
www.facebook.com/mcastx

A shelter established to protect, feed and house the stray, injured, abused and unwanted animals in Montgomery County, Texas.

Dog and Cat Adoptions

Thank you for your interest in adopting a pet from MCAS! If you can provide the special home our pets deserve, we can offer you a pet that will be a wonderful addition to your household. All MCAS animals are spayed/neutered, up-to-date on vaccinations, heartworm tested and micro-chipped. Our adoption fees are minimal. All adoption fees go toward rescue and care of our animals in need. The procedure for applying to adopt a pet is as follows:

Simple 1-2-3 Adoption Process

1. Complete an Adoption Application
2. Meet with an Adoption Counselor to determine if the pet is a good fit for your home
3. Process the Adoption Fee payment

Before You Buy... Adopt! No More Puppy Mills

A "puppy mill" is a breeding facility where dogs are bred purely for profit in large numbers. Puppy mills are distinguished by their inhumane conditions and the constant breeding of unhealthy and genetically defective dogs solely for profit. Puppies are often taken from their mother when they are 5 to 8 weeks old and sold to brokers who pack them in crates for resale to pet stores all over the country. The breeding dogs at the puppy mills are kept in small wire cages for their entire lives. They are almost never allowed out, and never allowed to touch solid ground or grass to run and play. If people in Texas refused to buy a puppy in a pet store, the misery of puppy mills in our state would end.

How sad is that puppy in the window?

By fostering, you can help save a life

Volunteer Program

We intake over 1,600 animals per month, and need help from volunteers to care, feed, walk, rescue, foster and help place our pets. We currently have over 400 volunteers in our network, but that is not enough to support the volume of animals we intake. We need as many volunteers as possible to place animals, work with rescue groups, walk dogs, work at our offsite and onsite events and spread the word about "Opt to Adopt at MCAS".

Go to www.mcasvolunteers.volunteerhub.com and register now.

Volunteer Roles

- Dog walking
- Offsite adoptions
- Rescue
- Kennel care
- Dog bathing
- Facility maintenance
- Shelter hosts
- Administrative
- Marketing
- Photography
- Local animal transport
- Foster care
- Cat socialization

Needed Supplies

- Dog/puppy food/treats
- Cat/kitten food
- Kitty litter
- Bleach/laundry detergent
- Dawn dish detergent
- Pet shampoo
- Towels
- Blankets/quilts
- Kennels/crates
- Newspaper
- Paper towels
- Used plastic grocery bags
- Leashes

Foster families are always needed

Our foster families provide temporary, in-home care for baby, special-needs or frightened animals waiting to be adopted. This program has already saved 500 pets.

Are you or someone you know considering giving up your pet?

Encourage them to find alternatives to turning them in to MCAS or any other shelter. Do the right thing for your pet. Make sure that your pet is completely vaccinated, heartworm negative, on a heartworm preventative and spayed or neutered. Then try the following steps:

- 1. Training** - If your dog has a behavior that you want corrected, training is a viable and affordable option. Professional trainers, Petsmart, Petco and your local pet food store can provide you with training services. All pets need training – they are not born with the ability to follow human commands. Additionally, cats may display behavior problems for medical attention, so see your vet.
- 2. Rehome** - Talk to your veterinarian, family and friends. Check with your network of family, friends, coworkers, neighbors or others who can provide responsible care for your pet. Make flyers and post your pet on facebook, www.mypetretreiver.com and www.woodlandsonline.com. Post a good picture of your pet and describe his or her personality, as well as why you have to give up your pet.
- 3. Rescue** - Contact a rescue group to help place your pet. Keep in mind, rescue groups are very full and they try to save animals in shelters who are facing euthanization. While they will not physically take your pet, they will post your pet on their websites or sites like www.petfinder.org. Many animals get placed this way.

Offsite adoptions promote our animals in the community and lead to many happy homes

We take in over 1,600 dogs and cats per month - help reduce this number by spaying and neutering your own pets
